PROJECT 🔗

Hospital Managment Application

- Developed a modern Hospital Management System (HMS) using Angular, Node.js, MySQL, and RESTful APIs.
- Designed an intuitive GUI for efficient data entry and management within the system.
- Ensured robust data security measures were in place for safe data handling.
- Utilized web technologies to create a responsive and user-friendly interface.
- The system streamlined HR processes, enhancing overall efficiency.

PORTFOLIO 🔗

- Skilled in web development, specializing in Nodemailer for email functionality.
- Angular specialist, creating dynamic, responsive UIs.
- Utilizes Bootstrap for mobile-friendly, cross-browser designs.
- Ensures full device responsiveness and integrates interactive forms with Nodemailer for efficient data collection.
- Enhances interactivity with JavaScript.
- Experienced in leading front-end development and collaborating in cross-functional teams.
- Proficient in Git for code repository management.
- Emphasizes clear project documentation for ease of maintenance and development.
